SUMMARY

Software Engineer with 3 years of experience building backend systems and machine learning applications. Skilled in Python, REST API development, and deploying ML models to production. Strong foundation in data structures, algorithms, and system design.

SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks: Flask, Django, REST API

Machine Learning: scikit-learn, TensorFlow, NLP, Deep Learning

Databases & Tools: MongoDB, SQL, Git, Docker, AWS

EXPERIENCE

Software Engineer — TechCorp Inc.

Jun 2022 – Present

- Developed and maintained REST APIs using Flask and Django, serving 10,000+ daily active users
- Built and deployed machine learning models using scikit-learn and TensorFlow for internal data pipelines
- Designed and optimized SQL and MongoDB database schemas, improving query performance by 35%
- Containerized services with Docker and deployed to AWS, reducing deployment time from hours to minutes

EDUCATION

Bachelor of Technology in Computer Science

State University — Graduated 2022

PROJECTS

Data Pipeline Automation Tool

Built an automated ETL pipeline using Python and SQL to process and transform large datasets, reducing manual processing time by 60%.
